

## SPONSORSHIP / SPEAKER PROSPECTUS

20 years of delivering innovative thought leadership and showcasing world-class technology from industry pioneers for FinTech and Capital Markets.

**A FOUR-EVENT SERIES**  
Q4, 2021

## HPC + AI WALL STREET EVENT SERIES

A strong presence at HPC + AI Wall Street 2021 will deliver new leads, strategic business connections, and the ability to gain market share in these unpredictable times.

HPC + AI Wall Street is formulated to advance the understanding of market-ready innovations, enabling growth, new revenue streams, and competitive advantages.

The global market size of High Performance Computing (HPC) was valued at \$34.62 billion in 2017, and is expected to expand at a Compound Annual Growth Rate (CAGR) of 7.2% through 2025. The global enterprise AI market was valued at \$4.68 billion in 2018, and is projected to reach \$53.06 billion by 2026, with a CAGR of 35.4% between 2019 and 2026.

In 2021 HPC + AI Wall Street is presenting four individual, high-impact sessions showcasing Financial Services thought leaders.

## EVENT FORMAT AND TIMELINE

Each event is organized in the same format, as outlined below. After each lighting presentation the moderator will take a few audience questions in a rapid-fire Q&A format, providing opportunities for audience engagement throughout. All sponsors will participate in the session's moderated panel discussion, along with that session's luminary keynote.

- Welcoming Remarks
- Luminary Keynote (15m)
- Opening Sponsored Keynote (15m)
- Lightning Presentations (15m apiece)
- Moderated Panel Discussion (30m)

# 2021 VIRTUAL SESSIONS

## **FINSERV IN THE CLOUD**

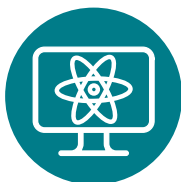

**Leverage HPC in the Cloud to Prepare for Bursts and Backup, Out-of-Firewall Testing, and Access to Readily-Available FinServ Applications**

## **FUTURE OF CRYPTO**

**Can We Speculate on the Future of Crypto Based on What We Know Today?  
Are We Emerging or Are We Beyond the Crypto Hype Cycle?**

An exploration of how data analytics can help project the risk and vulnerabilities of high growth crypto platforms. Can we trust an autonomous currency that has no government or natural resource backing and no reserve requirement? How can HPC and AI address the scale and forking challenges of global currency adoption and accelerate POS adoption of crypto currency and exchanges?

## **QUANTUM COMPUTING**

**Frustratingly Complicated, Quantum Computing is Racing Towards Deployable Applications That Promise to Upend Much of FinTech. Are You In or Out?**

The financial industry likes sure bets. So why is it chasing quantum computing? Can quantum computing's unpredictable magic be harnessed for outsized gains in portfolio optimization, derivatives trading, and cybersecurity? This session will look (a little) at what quantum computing is and (a lot) at what it might accomplish in FinTech.

## **DATA MANAGEMENT & STORAGE**

**Pushing the Limits on Data Management While Avoiding the Curse of GIGO**

More data means better results. But maintaining petabytes or exabytes of training data for neural networks poses unique challenges, especially in financial services. What are best practices at the extreme end of the data management spectrum, including tips on data governance, regulatory compliance, and avoiding the Curse of GIGO (garbage in, garbage out)?
