

## Artificial Intelligence and the Future of Search

September 2024

**Chris Pozezanac** 

Manager, Solutions Architecture

#### **About Elastic**

## **A Brief Overview**

Founded 2012, IPO 2018, NYSE: "ESTC"

3,500+ employees in 40+ countries

54% Fortune 500 companies

World's #1 database search engine (<u>DB-Engines</u>)

Over 4 billion downloads

One **Search** Analytics Platform Two Out-of-the-Box Solutions The Freedom to Build Anything

## **Deployment models**

Elastic Cloud Enterprise (ECE)

Manage a fleet of clusters in any infrastructure

Elastic Cloud for Kubernetes (ECK)

Manage a fleet of clustered in Kubernetes on any infrastructure

#### **Elastic Cloud**

Managed and hosted service on Google Cloud, Azure, AWS, Alibaba, Tencent, IBM.

> Support for latest ARM Graviton processors

Run ML models on GPU compute of your choice

#### Hybrid

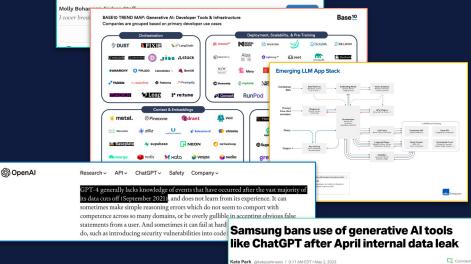

One single pane of glass regardless where you host your clusters with Cross Cluster Search

### Generative Al apps come with specific challenges:

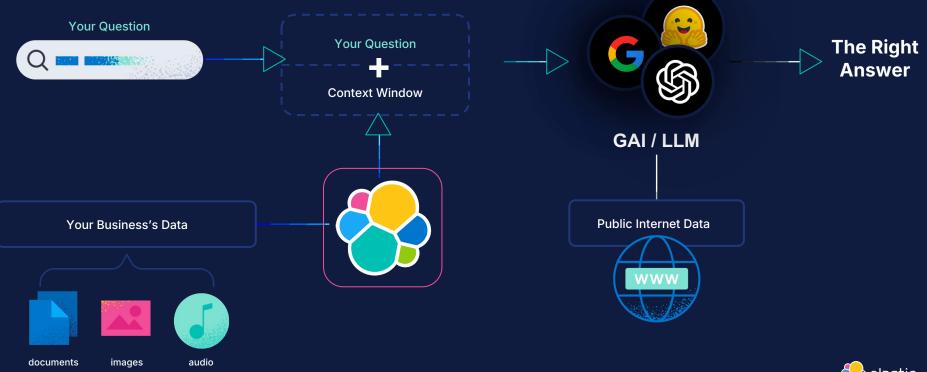

- Hallucination, Bad Answers
- Real-Time Access to Private Data
- Security & Privacy
- Cost Context Window = \$\$\$
- Out of Date on release
- Bias encoded in the models

#### Lawyer Used ChatGPT In Court— And Cited Fake Cases. A Judge Is Considering Sanctions

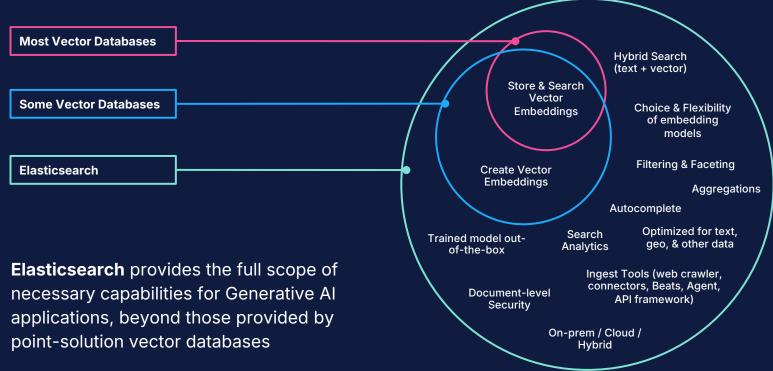

## **Elasticsearch Relevance Engine™ for RAG**

## Elastic has ALL the capabilities you need

# Automate Security Detection, Diagnosis & Remediation with GenAl

#### Detection

## AI Assistant

Powered by ESRE Elasticsearch Relevance Engine\*

- Accelerate incident management and root cause analysis
- Interactively explore problems and execute remedies with generative AI
- Context-aware, business-specific output you can trust
- Based on your proprietary data and runbooks

#### Elastic in Financial Services FSI Use Cases & Customers

- Searching for relevant payments, investments transactions, and services
- Analyzing data for a more complete view of customers, users, transactions, trades, (incl. fraud/AML, customer service, etc)
- Unified Observability & Security to find answers fast, resolve problems, and protect their customers and reputation
- Leveraging GenAl and Elastic's unique capabilities to advance these use cases and more...

#### Wells Fargo accelerates digital innovation to put customers first with **Elastic Observability**

Industry: Financial Services Location: USA

"Elastic gives us the confidence to build and deploy innovative solutions faster."

Joe Korchmar **Distinguished Engineer** Wells Fargo

#### CUSTOMER BIO

One of the four largest banks in the U.S., Wells Fargo has approximately 4,900 branches, 12,000 ATMs, and 70M customers worldwide, including one in three U.S. households.

#### THE CHALLENGES

- Tracking business to business (B2B) and business to consumer (B2C) financial transactions in near real-time.
- Accelerating financial services time to market.

#### THE ELASTIC SOLUTION

- Wells Fargo monitors its applications and the back-end services with Elastic to track KPIs, customer responsiveness, application availability, and MTTR.
- With distributed tracing through Elastic Observability, Wells Fargo operations and development teams have improved insights and greater confidence when bringing new capabilities and applications to market.

#### THE OUTCOMES

- Ability to analyze application flows in near real-time
- Provides visibility to development and operations teams to quickly identify root cause, slow performing code, and resolve issues faster.
- Monitor and address events across all systems in near real time and focus attention on the areas that have the greatest impact on the bank's operating costs and revenues.

**Conversational Search with** 

watsonx Discovery

Combining IBM's market leading conversational search experience, and large language models with Elastic's powerful and flexible retrieval engine.

- Natural language search
- Federated across locations
- Vector search combining multiple data sources

## What's Next for Search?

#### November 13 | New York City

## ElasticON Tour: Supercharge <anything> with Search Al
